## THE ROLE OF BLUETOOTH IN MOBILE ACCESS CONTROL

By **Scott Lindley**  
General Manager

As seen in [Professional Security Magazine](#)

Using smartphones in access control systems is the new buzz in discussing readers and credentials. Electronic access control manufacturers are promoting the various ways that mobile technology, soft or virtual credentials, can be used to replace cards. It's not surprising that all are trying to get on board.

## Spotted on the Street

It is not uncommon for members of Farpointe's team to come across their products in their travels. Farpointe's General Manager, Scott Lindley, happened upon a Farpointe proximity reader installed on the front of an apartment building while strolling the streets of Redwood City, California.

The unit pictured here is Farpointe's P-500, part of the *Pyramid Series Proximity®* line of 125-kHz proximity readers and credentials.
