MAXSecure™
CODE REQUEST FORM

Exclusive to Farpointe Data's *Pyramid Series* Proximity® line and Delta® Contactless Smartcard Readers, MAXSecure may be used to increase the security of any data format, such as Wiegand and ABA Track II magnetic stripe. MAXSecure adds a unique, high-security smart card-like hand-shake between reader and card, providing positive authentication before any card data is transmitted from the reader to the access controller. This can be used to ensure that your credentials in the field are unique (no duplicates!) and that unauthorized parties will not be able to order duplicates of your credentials, much less read them. These attributes lead to greatly increasing the security of the system. To maintain security, MAXSecure credentials can only be programmed in the factory by Farpointe Data.

To obtain a MAXSecure code, please complete the table below:

MAXSecure APPLICATION INFORMATION

Authorized Contact Person: _____

Title: _____

Company Name: _____

Street Address 1: _____

Street Address 2: _____

City:_____ State/Province: _____ Zip/Postal Code:_____

Country: _____ Email: _____

Phone: _____ Fax: _____

Authorized Contact Signature: _____ Date: _____

Integrators and end users may also request a MAXSecure code, though they must authorize a Farpointe direct customer to purchase readers, cards, and tags on their behalf. We ask that these indirect customers also complete the MAXSecure Authorization Table below:

MAXSecure AUTHORIZATION INFORMATION

Farpointe's Direct Customer: _____

Authorized Contact Person: _____

Title: _____

Company Name: _____ Email: _____

Phone : _____ Fax: _____

Authorized Contact Signature: _____ Date: _____

Your Farpointe Data representative will confirm your assigned MAXSecure code. When desired, please make certain to specify this MAXSecure code on your purchase orders, along with the format and credential details.
